

REDSTER GEN S FAMILY

Redster S9 Gen S

Redster S9 Gen S is our world cup race-winning ski with a super lightweight construction, epic power transmission and maximum acceleration. When speed and performance is everything, and hundredths matter.

Redster S8 Gen S

For committed skiers at every level and distance. Redster S8 Gen S is built for pushing limits and beating personal bests – with a lightweight construction plus strong power transmission and acceleration.

Redster S7 Gen S

Stability. Efficiency. Speed. Redster S7 Gen S is the ski that helps skiers go faster for longer every time they're on track. Built with a racing spirit, it's lightweight and dynamic with enhanced steering control.

REDSTER S9 GEN S

REDSTER

Energy-saving efficiency

With a wider tip and tail from the Speedline sidecut, you'll get a stronger push — which means longer strides, improved steering ability, and a big boost to skiing efficiency.

Superior agility

Speedscale geometry makes the ski more precise and maneuverable so you can perform your best. The special geometry also enables skis to be shorter than usual, for greater agility than ever before.

Race-winning acceleration

Speed is everything when fractions of a second count. Racewall — our new sidewall construction — generates an even closer connection between ski edge and snow, meaning more direct power transmission, more stability, and faster skiing.

REDSTER

Gen S stability and agility

Our unique Speedscale ski geometry allows skis to be shorter than usual while boosting precision, agility and maneuverability. It also delivers better steering control and stability than ever before.

Stride efficiency

With its wider tip and tail, the Speedline sidecut creates a stronger push – for longer strides, improved steering and a big boost to skiing efficiency.

Accelerated progress

The 'Racewall' sidewall construction generates a closer connection between ski edge and snow. Delivering more power transmission, acceleration – and personal progress with every stride.

PRO CLASSIC

Precise yet stable

With a slightly wider sidecut, Pro Classics are precise and fast – but also stable. The perfect combination for fitness, improving technique, and enjoying your time on the tracks.

Dependable performance

Pro Classics are light and built to perform, but with a smooth, easy and forgiving feel that makes them the ideal daily training companion.

Any conditions, any time

Time after work? Pro Classic skis offer great grip & glide in all snow conditions, and with Skintec available you don't even need to kick-wax. Just pick up your skis and get going.

PRO SKATE

Superb stability

The Pro's Easy Edge Sidecut is a parallel sidecut, making it easier to set your edge on the snow for superb stability. Ideal for fitness skiing and improving technique.

Total control

The wider Comfort Tip and double grooves in the base generate easier steering and better control for effortless skating. The perfect training companion for beginners and intermediate skiers.

Maximum enjoyment

From after-work laps to weekend runs, our Ease Adjustment with a low and soft camber adjustment – and therefore longer contact zone – helps you perform and enjoy your skiing to the max.

WEIGHT RECOMMENDATION NORDIC SKI

On our Pro and Redster ski range you'll find a sticker on each ski that shows the individual characteristics of that ski. This includes its ideal weight range, based on the ski's specific length and flex. There are two different stickers, one for Classic and one for Skate:

CLASSIC

This sticker includes a color coding for different conditions: cold (blue ■), universal (yellow ■) or warm (red ■). The sticker shown below is for a cold ski which is recommended for skiers between 72–94 kg (159–207 lbs), perfectly suitable for 80–90 kg (176–198 lbs). In addition, there's a special sticker for Skintec (color coding grey ■).

SKATE

The sticker shown below is for a ski which is recommended for skiers between 70 – 80 kg (154 – 176 lbs).

NORDIC SKI TECHNOLOGY

GEN S TECHNOLOGY

Redster Gen S technology represents the pinnacle of skate ski performance with a redesigned ski shape for maximum stride efficiency, a shorter body for increased control and agility, and a new sidewall that boosts power transmission.

SPEEDLINE

Speedline is our new deeper sidecut with a wider tip and tail (47-40-47mm). This new shape enables longer strides, better stability and a big boost to skiing efficiency.

SPEEDSCALE

Speedscale is the unique Atomic ski geometry that means our skis can be shorter than usual. This boosts precision and makes them more agile and maneuverable than ever before.

RACEWALL

Racewall is a new sidewall construction used on our top skating skis. It generates an even closer connection between ski edge and snow, meaning more power transmission, more stability and faster skiing.

SKINTEC TECHNOLOGY

Skintec delivers the feel of a perfectly waxed ski – without any wax. 100% Mohair skins work in all conditions and can be changed without tools. Skintec skis are now our most popular models, with a full range available for all XC skiers. Skintec was created in our Atomic factory at Altenmarkt. It was the first skin technology on the mainstream market and has been pushing skin technology forward ever since.

EASY SKIN EXCHANGE

With Atomic Skintec you can easily exchange Mohair skins in seconds by yourself. Pick from a variety of skin options to suit terrain, conditions and how you want to ski.

100% MOHAIR SKINS

We use 100% Mohair in our skins as it has the best kick and glide properties in a wide range of conditions, and it's extremely robust.

UNIVERSAL SKIN: ALLROUND

The standard skin with optimal kick and glide properties in a wide range of conditions.

- Universal version delivered on all Atomic Skintec skis
- 100% mohair

SPEED SKIN: BETTER GLIDE

With a special weaving that's even better for gliding and double poling. Optimal on dry snow –3° or colder.

- Ideal for racers, seeking the most speed or for slower snow conditions
- 100% mohair

GRIP SKIN: BETTER GRIP

Is more geared towards climbing, with shorter hair for a safer grip uphill and better control downhill.

- Ideal for skiers wanting more secure grip and even for pulling a pulk sled
- 100% mohair
